Merchants and dealers supplied, as usual, upon BORDENTOWN ACADEMY. 273 1112 central position of Bordentown, its singular salubrity, and its facility of access from the principal cities in the Union, have long marked it out as a most eligible lucation for seminaries of learning. For the information of those who have not visited this town, the following extract from the Right Rev. Bishop Dean's last conventional address, is here inserted :-- "There is certainly no place in the whole country, better fitted for the establishment and support of schools and seminaries of learning, than Boulentown. Most beautiful for situation, proverbral for health, at the head of steamboat navigation, on the Delaware, and accessible lwice in every day from New York, and from Pulla le phia, the ground has but to be broken to ensure the most abundant harvest." The Reverend Mr Amold, A. M. of the University of Reverend Mr Amold, A. M. of the University of Windsor, (Nova Scotia,) respectfully announces to the public, that arrangements have lately been completed for the establishment of a boarding, and day school here, which, (God willing,) will be leady for the reception of pupils on the first day if May. The building which has been procured for the purposes of the school, is situated near the bank of the Delaware, more than sixty feet above the surface of the water, surrounded hy a beautiful and convenient area for gymnastic exreises, and commanding an extensive prospect of SPRING AND SUMMER GOODS - consisting of Staple and Fancy Articles; all of which will be sold at a small advance on prime the first of the river and surrounding country, which, in beauty, tichness, and variety of scenery is not surpassed by any in America. The whole estalishment is every way adapted to its destined purpose. Mr. Arnold is happy in having in a member of his own family, a lady who has been long accustomed to the domestic care of youth, and who, from her amiable character and mild disposition, is pecu-harly qualified for this office, while her natural and tender fondness for children will lead her almost spontaneously to use every means to pro-mote the the tealth, comfort, and convenience of the pupils. The most able and accomplished teachers will be employed to instruct in the various branches of useful and ornamental knowledge; nor will the morals of the pupils fail to receive that watchful attention which is due to their paramount importance, -- for "what is good learning without good murals?" The system of government will be mild and parental, but sufficient energetic to preserve perfect order and regularity. If any pupil shall be found irreclaimable by arguments of reacon or moderate correction, to avoid and the public, generally, are requested to give thim a call, as he flatters himself he shall be able to furnish something snitable for every taste.

But passing by all that has been objected to by those liberal critics, who would perform the Procrustean operation, and lop off or stretch the minds of every man, woman and chill to precisely their own measure, there is enough left to give the journal more than a transient reputation. It abounds in poetry, strong and original reflection, criticisms of rare ability, and evidences enough to sitisfy the reader that it is the pr duct of a mind of no ordiromaace, and to all that is Leantiful in nature, and excellent in art, it renders a prompt and fervent homage. These qualities are enough to outweigh the so cailed faults, were they trebled in amount; but in our judgment, they are so mingled as to produce the effect a skilful artist would lesire—an enlivening alternation of light and shade—here a little of what we don't like, and there much that is exactly to our taste; and our candid impression is, hat the journal is more than a match for ill the burs that crawl between Maine and Louisiana.
